Evaluation Orientation

You or your doctor indicated that your primary sleep difficulty is insomnia. Our treatment approach for insomnia reflects the National Institutes of Health treatment consensus for insomnia and emphasizes initial non-medication, treatment approaches.

Your initial appointment is scheduled with one of our insomnia specialists (Ph.D/Psy.D), specializing in, or certified in behavioral sleep medicine. The specialist will conduct a thorough evaluation of factors that contribute to your sleep difficulty. As part of the evaluation, you will be assessed for other sleep disorders that may occur with insomnia.

Following the evaluation, you should have an improved understanding of your sleep difficulties, as well as an integrated treatment plan. If you are already on medications or would like medications, options that involve medication may be included as part of the treatment. If your physician also ordered a sleep study, the specialist will discuss the study with you should it still be necessary after your consultation.

If you have any questions or concerns about the materials, or to contact Center scheduling staff, please call 708-364-0261 ext. 1.

Beliefs and Attitudes About Your Sleep (DBAS – 16)

Beliefs and attitudes about sleep both shape, and are shaped by, sleep difficulties. Below are several statements about sleep related beliefs and attitudes. Please indicate to what extent you personally agree or disagree with each statement. There are no correct or incorrect answers.

1. I need 8 hours of sleep to feel refreshed and function well during the day.

2. When I don’t get the amount of sleep I need, I have to catch up the next day by napping or on the next night by sleeping longer.

3. I am concerned that chronic insomnia may have serious consequences for my physical health.

4. I am worried that I may lose control over my abilities to sleep.

5. After a poor night’s sleep, I know that it will interfere with my daily activities on the next day.

6. In order to be alert and function well during the day, I am better off taking a sleeping pill rather than having a poor night’s sleep.

7. When I feel irritable, depressed or anxious during the day, it is because I did not sleep well the night before.

8. When I sleep poorly on one night, I know it will disturb my sleep schedule for the whole week.

9. Without an adequate night’s sleep, I can hardly function the next day.

10. I can’t ever predict whether I’ll have a good or poor night’s sleep.

11. I have little ability to manage the negative consequences of disturbed sleep.

12. When I feel tired, have no energy, or just seem not to function well during the day, it is generally because I did not sleep well the night before.

13. I believe insomnia is essentially the result of a chemical imbalance.

14. I feel insomnia is ruining my ability to enjoy life and prevents me from doing what I want.

15. A “nightcap” before bedtime is a good solution to sleep problems.

16. It usually shows in my physical appearance when I haven’t slept well.
Treatment Motivation and Expectations

1. If your insomnia were successfully treated, in what ways would your life be better?

2. If there was a treatment we could use that would fix your sleep difficulty, but to get better it would mean that you’d get worse before you got better, how much worse would you be willing to get?

ePrescribing is defined as a physician's ability to electronically send an accurate, error free, and understandable prescription directly to a pharmacy from the point of care. Congress has determined that the ability to electronically send prescriptions is an important element in improving the quality of patient care. ePrescribing greatly reduces medication errors and enhances patient safety. The Medicare Modernization Act (MMA) of 2003 listed standards that have to be included in an ePrescribe program. These include:

- **Formulary and benefit transactions** — Gives the prescriber information about which drugs are covered by the drug benefit plan.

- **Medication history transactions** - Provides the physician with information about medications the patient is already taking to minimize the number of adverse drug events.

- **Fill status notification** - Allows the prescriber to receive an electronic notice from the pharmacy telling them if the patient's prescription has been picked up, not picked up, or partially filled.

By signing this consent form you are agreeing that Associates in Sleep Medicine/The Center for Sleep Medicine can request and use your prescription medication history from other healthcare providers and/or third party pharmacy benefit payors for treatment purposes.
